Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 10-14 and 21-31 are drawn to an isolated molecule containing two antigen binding sites linked by a peptide to dual antigen-non-binding regions, classified in class 530, subclass 305 for example.

II. Claims 32-38 are drawn to an isolated molecule consisting of two light chain variable domains from immunoglobulins wherein an acidic amino acid is replaced by a hydrophobic amino acid, classified in class 530, subclass 387.1 for example.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are directed to different synthetic products having different requirements/limitations. The molecule of invention I contains two antigen binding sites, a peptide linker, and two non antigen binding regions while the molecule of invention II merely consist of two light chain variable domains modified to contain a hydrophobic amino acid. Thus the structures/sequences/compositions of the two inventions are diverse with separate parameters for patentability. Further, the molecules have not been disclosed as capable of use together. According restriction is proper.

Art Unit: 1641

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper. Please note that the classifications in the restriction are illustrative only and **do not** represent all the classes and subclasses which must be searched for each invention; nor is the search limited to issued US patents, but rather includes foreign patents and applications as well as literature searches.

4. Applicant is advised that the reply to this requirement be complete and must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

Please note: The new claims submitted 21 October 2002 in paper #19, appear to direct the inventive composition to sequence modification of amino acids. For example see claims 27-29, 32, and 34-35. However, no sequence identification numbers have been filed in the application. Therein the application is not in compliance with sequence rules.

Art Unit: 1641

Sequence Non-Compliance

6. This application contains sequence disclosures that are encompassed by the definitions for nucleotide and/or amino acid sequences set forth in 37 CFR 1.821(a)(1) and (a)(2).

However, this application fails to comply with the requirements of 37 CFR 1.821 through 1.825 for the reason(s) set forth on the attached Notice To Comply With Requirements For Patent Applications Containing Nucleotide Sequence And/Or Amino Acid Sequence Disclosures. Applicant must comply with the requirements of the sequence rules (37 CFR 1.821 - 1.825) before the application can be examined under 35 U.S.C. §§ 131 and 132.

Applicant is given ONE MONTH from the mailing date of this communication within which to comply with the sequence rules, 37 CFR 1.821 - 1.825. Failure to comply with these requirements will result in ABANDONMENT of the application under 37 CFR 1.821(g). Extensions of time may be obtained by filing a petition accompanied by the extension fee under the provisions of 37 CFR 1.136(a). Direct the reply to the undersigned. Applicant is requested to return a copy of the attached Notice to Comply with the reply.
